

### **Big Idea: Littleport Geographers!**

We have had a great week learning all about Littleport and our homes. The children have painted pictures of their houses, found their houses on google maps, looked at maps of Littleport and Ely to make our own maps of our journey to school, created an estate agents in the role play and even made the whole of Littleport in construction outside complete with church, co-op, dentist, river, bridge and even a pub!! It's been great becoming such super geographers this week!

### **Next Week's Big Idea and Big Challenge**

For the last two weeks before the holidays we will be looking at all things creepy crawly!

Our Big Idea of Worms and Bugs will see us becoming bug hunters, painting bugs, measuring worms, learning about record breaking bugs, returning to the wonderful David Attenborough for some facts about unusual bugs as well as reading lots of information books and stories with bugs and worms! Why not go on a bug hunt in your garden and see how many bugs you can find? Maybe you could make a tally chart of different types of bugs or even make a map of where you found them! Have you got any books about bugs at home? Maybe you could become a bug expert and make your own information book containing lots of facts? Don't forget to post what you get up to on Tapestry so that we can have a look at school altogether! Have fun exploring and learning!
